Telecommunications

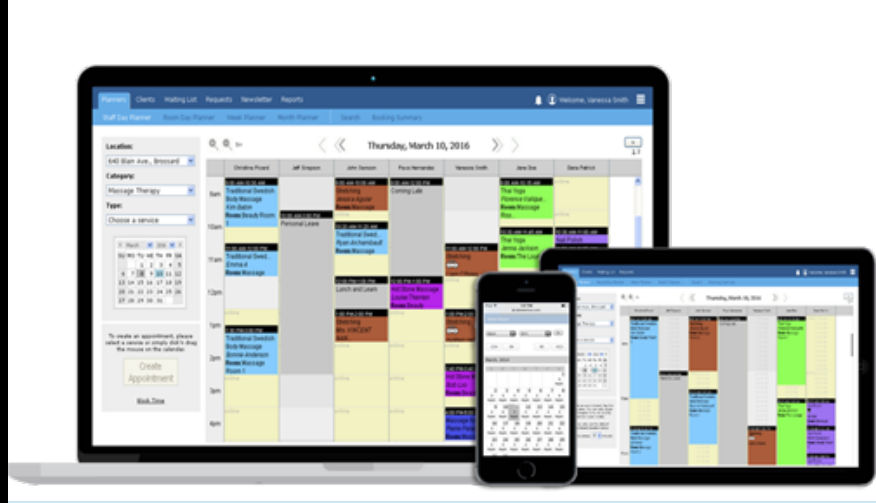
TeleCodia offers a wide range of telecom solutions for telecom service providers, healthcare, Government & education. We offer telecom strategy, eGovernance, consulting services, cloud voice & video, Robotic Process Automation, WiFi solutions, contact center solutions, broadband internet & mobile phone plans.

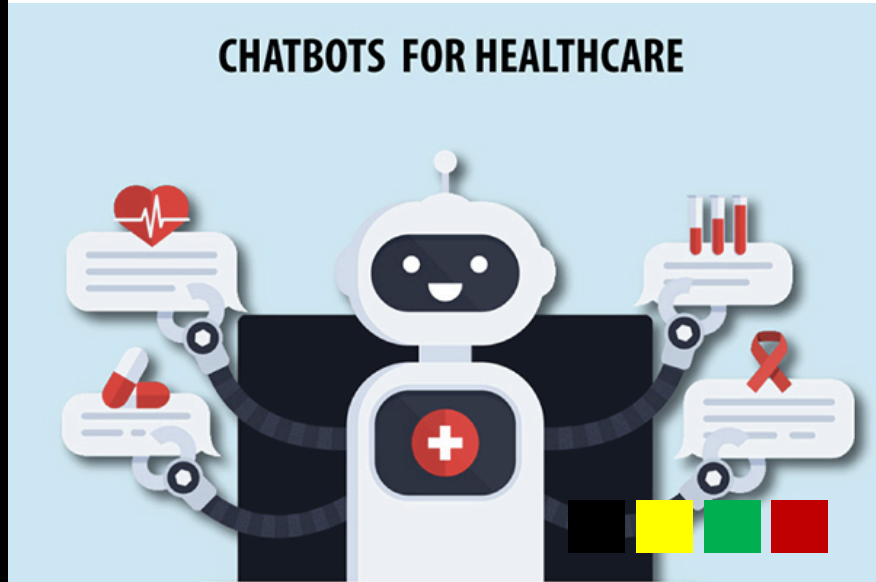
Our prices and plans are suited for small, medium and enterprise businesses.

Software & AI

We provide customised software solutions, appointment booking apps, voice assistants & AI chatbots.

We deliver AI-enabled conversational exchange and a personalized experience for your customers. Mobile & Web Apps, eCommerce Software and IOT related software services are available.





Artificial Intelligence

TeleCodia offers comprehensive AI solutions tailored to your unique needs. We work with our customers to develop a high impact AI strategy for their industry, refine the data foundations and design meaningful human-AI interactions.

We provide consulting services that cover all facets related to AI adoption and implementation. With our expertise in AI as a Service and accessing reliable data, we train our models, label large datasets using automation, and deploy data augmentation techniques.

Automation

We help customers with automation strategy, a framework that provides businesses with a comprehensive and integrated approach to the automation of processes.

Our Robotic process automation (RPA) and Business Process Automation (BPA) are both defined by automation strategies that measure scope, reliability, and impact.

03

Engagement Process

Our Engagement Process

1. Call us, send us an email or we'll reach out to potential customers for initial discussion

2. We gather customer requirements, understand customer's concerns and pain points, provide advice, and initial High Level design

3. We provide a detailed design, solution proposal , and produce a quote

4. Once customer accepts the quote & pays deposit, we start planning the implementation of the solution

Our Partners

Solution Partners

In addition to our staff, we use solution partners from Australia, USA, Canada & other areas supplying state of the art solutions

Telecom Partners

Our telecom solution partners are one of the innovative companies in the Australian market

Deployment Partners

Our solutions & software are deployed by our staff, however, we sometime use deployment partners who have expertise in their respective fields
